America's leading innovators strongly support the Patent Reform Act of 2007 (S. 1145) and urge its swift passage by the U.S. Senate.

American innovation, growth and competitiveness benefits from a strong and balanced patent system.

That's why a rapidly growing majority of policymakers, legal scholars, economists, business leaders and major editorial boards agree, for the sake of our innovators, workers and consumers it's time to modernize, strengthen and rebalance our patent system.

After years of study and compromise; of calls to action and careful examination; of a steady drain on our economy and innovation; the time has come to act.

Pass the Patent Reform Act of 2007.
