

Do Small Businesses Deserve Affordable Health Care? **Of course they do!**

That's why over 85% of Americans agree—it's time for Congress to pass Small Business Health Plans*

America's small businesses and the self-employed have been saying it loud and clear: they need affordable health plans. Now, there's a bill before the U.S. Senate that will allow small businesses to pool together, just like large corporations, to receive more affordable health insurance.**

The over 1.2 million members of the National Association of REALTORS®—*most of whom are self-employed*—urge the U.S. Senate to pass Small Business Health Plan legislation. Millions of hard working American families would finally be able to afford the health coverage they deserve.

* Public Opinion Strategies and Lake Research Poll March, 2006

** U.S. Senate Bill 1955
